

## THE START OF SOMETHING GREAT... A FIRST FOR CANADA!

*Left to Right: Tim Murphy, Executive Director, CH.I.L.D. Foundation National IBD Network; Sally Brown, Facilitator; Mary Parsons, President and Chief Executive Officer, CH.I.L.D. Foundation, Dr. Aubrey Tingle, CH.I.L.D. Foundation Scientific Research Advisory Council; Dr. Phil Sherman, Scientific Director, Canadian Institutes for Health Research, Institute of Nutrition, Metabolism and Diabetes.*

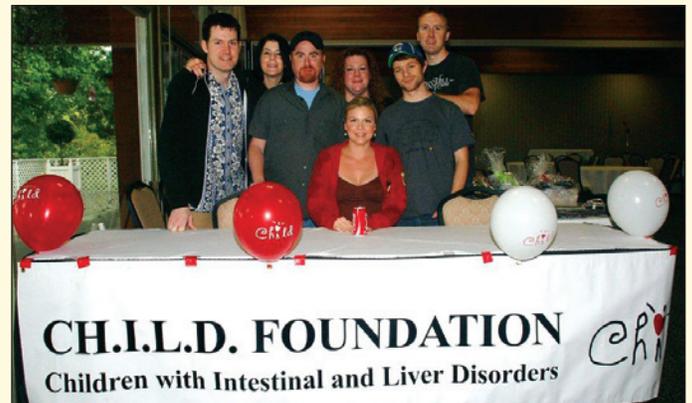

### THE CH.I.L.D. FOUNDATION AND CIHR COLLABORATE FOR CHILDREN

Research to help children with Crohn's Disease and Ulcerative Colitis got a big lift in June of this year. The CH.I.L.D. Foundation was pleased to co-host the Consultative Workshop on Establishing a Canadian Pediatric Inflammatory Bowel Diseases (IBD) Network and Data Platform with The CIHR Institute of Nutrition, Metabolism and Diabetes. This workshop took place in Toronto and was attended by over 20 physicians and researchers in the gastroenterology field from across Canada. The CH.I.L.D. Foundation is looking forward to working with CIHR to create a national network on pediatric IBD research a reality. *Story Page 5.*

**THANK YOU PEARL JAM!**

The Band's year-long 20th-anniversary celebration marathon was capped by an energetic performance at the Pacific Coliseum in Vancouver September 25, 2011. Funds raised at pre-concert parties in every city of the Tour benefitted charities. The Vancouver Pre-Party for fans was held beside the concert venue at Hastings Park and raised \$2,500 for the CH.I.L.D. Foundation by auctioning Pearl Jam memorabilia. Thank you to Clayton Paakspuu for promoting the CH.I.L.D. Foundation's cause to help ill children with Crohn's Disease and to Laura Trafton, head of Pearl Jam's Wish List Charitable Foundation for making it all a great success!

Left to Right: Clayton Paakspuu, Brandon Parsons, Brad Laing, Laura Trafton, Nicole Hawrysh, Sam Dillsi, Eric Long.

# Thank You White Rock!

We appreciate your enthusiastic reception of **Snowbirds Fly for CH.I.L.D.**  
July 27, 2011

Proceeds from the air-show will provide meaningful research for children who suffer from Crohn's Disease, Ulcerative Colitis and Liver Disorders.

We are grateful to the **Canadian Forces Snowbirds 431 Air Demonstration Squadron** for an outstanding show. They are remarkable Ambassadors for **The CH.I.L.D. Foundation and for Canada.**

**The Foundation for Children with Intestinal and Liver Disorders**

Many Thanks to our Wonderful Sponsors:

Donations to the CH.I.L.D. Foundation gratefully received:  
#201 - 2150 Western Parkway, UBC Campus Vancouver V6T 1V6 Charitable Reg #: BN89897 4951 RR0001

**IN APPRECIATION...**

We would like to pay a special tribute to some of the remarkable families, businesses and organizations that have gifted The CH.I.L.D. Foundation in recent weeks.

*Left:* Bud and Vivian Walker with Ken and Heather Ryan present a cheque to The CH.I.L.D. Foundation emanating from Great Canadian Dollar Stores Hot Dog Days for CH.I.L.D. in Victoria, B.C.; *Centre:* Wild West CanCan Dancers Society's Deanne Harris (Candee), Elise Vasey, and Vivian Hemingson (Viva Diva) presents cheque to Mary Parsons, President and Chief Executive Officer, CH.I.L.D. Foundation; *Right:* Glenn Brooks presents Jamie Hunt, CH.I.L.D. Foundation Events' Coordinator with a cheque from TEAM TELUS CARES. Our appreciation to the Estate of Helen Thomson; Donald Copan; HYDREX; Inform Food Brokerage Inc.; Macdonald Dettwiler & Associates; and North Vancouver Host Lions.

## A MESSAGE FROM THE PRESIDENT

After an amazing summer with Snowbirds Fly For CH.I.L.D. and distributing CH.I.L.D. coin boxes all over the Lower Mainland, plus fun golf tournaments and an awesome pre-party for Pearl Jam devotees, we are now well into the busy Fall with the 21st Annual Doormen's Dinner. Congratulations to Red Robinson, a valued Director of The CH.I.L.D. Foundation, for being awarded the Honourary Doorman of the Year!

We were so pleased to co-host a workshop last June with CIHR – Institute of Nutrition, Metabolism and Diabetes to further our goal of finding a cure for IBD via implementation of a National Pediatric IBD Network and Data Platform. It was a magic day to see the culmination of many years' thought and planning, with all the participants eager and enthusiastic to work together.

The CH.I.L.D. Foundation is grateful to Tim Murphy for his articulate commentary, to Dr. Aubrey Tingle for his steadfast stewardship and Dr. Parminder Singh for his valued help. Thank you to Dr. Phil Sherman and his staff, and all the stakeholders, for making the Toronto workshop a big success!

Mary Parsons

## LEARNING TO DISCUSS THE UNSPEAKABLE...

Reprinted from PEACE ARCH NEWS, published July 13, 2011

By Hannah Sutherland

Kyle Hadwin didn't know anything about Crohn's disease when he was diagnosed at age nine. "I hadn't heard of it," he said. "I even doubt my parents had." Now, after living with the inflammatory bowel disease for 12 years, Hadwin wants to open people's eyes to the condition. "Nobody talks about it," Hadwin told Peace Arch News last week from his room at St. Paul's Hospital in Vancouver. "People who have it don't talk about it. I'm sure there's probably people in your life who have it and you don't know because no one talks about it." Hadwin knows all too well how devastating the disease can be after his first introduction to it in the summer of '99.

He began having stomach cramps and lost his appetite. Over the next six months, he dropped around 60 pounds. Hadwin – whose father is a Morgan Creek Golf and Country Club pro – was tested in hospital and diagnosed with Crohn's in March 2000. Other than having to take medication and visiting BC Children's Hospital every six weeks, the condition didn't affect Hadwin's life much in those early years. Between the ages of nine and 13, the only difference he noticed was decreased energy. "You just don't have as much as everybody else, but it's not terrible," he said. Four years later, Hadwin's medication stopped working and he had his first flare-up. "I was put on steroids, which is the aggressive treatment for it, and that took care of the flare-up in about eight weeks." Hadwin – who was put on a couple of different medications after that – said flare-ups could occur every couple of months to years.

When they hit, he would miss a week or two of school until the drugs kicked in and he could resume his regular routine. "I graduated high school without missing any extended periods of time, living a fairly normal kid's life besides a few smaller issues," the Abbotsford resident said. "Up until 19, I carried on with my life."

Just before Hadwin was to attend university in the fall of 2009, he experienced complications with the disease and was forced to put school plans on hold. Since then, he has had numerous surgeries, some to repair holes in his colon and small intestine. At one point, he had two surgeries 14 days apart, and post-surgery complications resulted in a 94-day stay in hospital. Hadwin said the disease weakened his colon and the walls of his intestines. Last May, he had surgery to remove his colon altogether. He has been recovering in hospital since, and knows it won't be his last time doing so. "Part of the problem with surgery on your bowels is they get really irritated, so you can't have a whole lot of surgeries right next to each other," he said, noting he may have another in a year or so.

While putting their energy into Kyle Hadwin's battle, he and his family have also been giving their attention to CH.I.L.D. Hadwin said his father held a golf tournament for the foundation at Morgan Creek Golf Course a couple years ago, and is working on another one for next year. His brother, Adam, has also been using his golf skills to support the cause. Adam Hadwin, 23, played in the U.S. Open last month, and pledged \$100 to the charity for each birdie he made. He challenged others to do the same, and – after Hadwin made 14 birdies over the course of the week – the campaign raised about \$30,000. "It exceeded my expectations," Kyle Hadwin said.

While he is looking into other ways to fundraise, he said his main focus is still to spread awareness about Crohn's disease and ensure that others battling the condition know they are not alone. "As bad as you think you've got it, somebody else has the exact same thing." Scheduled for release from hospital in a couple weeks, Hadwin is now looking forward to his next chapter, which includes studying civil engineering at University of Saskatchewan in September 2012. "(I'll) go to school for four years, get my degree – start my life."

*Editor's Note: Kyle is now enjoying home and doing well, reuniting with friends and family.*

*As bad as you think  
you've got it,  
somebody else  
has the exact same thing.*

## ...AND CREATE “BIRDIES FOR CH.I.L.D.”

Four Days and One Dedicated Family Nets Over \$30,000 for The CH.I.L.D. Foundation! That’s how long it took for the Hadwin Family of Abbotsford to plan and execute the successful fundraising event culminating on Congressional Golf Course in Maryland at which Adam Hadwin garnered 14 birdies at the US Open. Adam donated \$100 for every birdie he made during four tournament rounds to the CH.I.L.D. Foundation and Adam’s brother, Kyle, asked that fellow golfers and friends also pledge an amount for every birdie Adam attained. The results were phenomenal! Thank you to the many supporters and contributors for enjoining with Adam and Kyle in pledging to Birdies For CH.I.L.D. Monies raised will go towards accelerating research for Crohn’s Disease. We very much appreciate the entire Hadwin Family for their support.

*Adam Hadwin*

## THANK YOU P.A.M.A.

The 19th Annual PAMA Golf Tournament for CH.I.L.D. was held at Westwood Plateau Golf Club in Coquitlam and raised over \$8,000 for The CH.I.L.D. Foundation. Expertly produced by the Professional Association of Managing Agents’ Executive Director Roger Williams and enthusiastic volunteers, the slightly overcast day provided perfect golfing weather. Thank you to Latham’s, Coastal Insurance Services, Phelps Smart Laundry, Genesis Restorations Ltd. and Brighter Mechanical for being gracious sponsors and contributors to a great day.

## CIHR PARTNERS WITH CH.I.L.D.

Cover Story

On June 27, 2011, leaders and key stakeholders from the Canadian Pediatric IBD community gathered in Toronto to attend a consultative workshop (co-sponsored by the CH.I.L.D. Foundation and CIHR – Institute of Nutrition Metabolism and Diabetes) designed to advance the design, build and implementation of a National Pediatric IBD Network and Data Platform.

The workshop was designed to achieve the following objectives:

- 1) articulate the scientific goals for a Canadian Pediatric IBD Network;
- 2) discuss the required infrastructure and governance structure required to optimize the functioning of such a network; and
- 3) factor in other elements needed to ensure successful network implementation.

The key themes that emerged from the deliberations reinforced several of the concepts and models previously examined by the CHILD Foundation, including the importance of this initiative for patients and their families as well as the sense of readiness and enthusiasm across the research community for moving forward.

In the near future, the CH.I.L.D. Foundation will announce their financing leading towards the establishment of a Canadian Pediatric IBD Network and data platform. The CIHR Institute of Nutrition Metabolism and Diabetes is committed to launching a call for applications reflecting the advice received during the deliberations of the workshop.

## SNOWBIRDS FLY FOR CH.I.L.D.

**Canadian Forces Snowbirds Treat Children to A Day in The Hangar Before Aerial Show. Thanks to Presenting Sponsors Bombardier Inc. and Coast Capital Savings!**

Snowbirds Fly For CH.I.L.D. began with joy and wonderment as over 60 children and their families gathered at Landmark Aviation at the Vancouver International Airport to meet with Canadian Forces Snowbird pilots. The kids never ran out of questions and the pilots showed how they fly their nimble jets with utmost precision. The children were given souvenir T-Shirts as well as gifts from Heritage Canada and Coast Capital Savings, one of the presenting sponsors. A buffet lunch was enjoyed while waiting for the Snowbird pilots to arrive. Mary Parsons, President and Chief Executive Officer of the CH.I.L.D. Foundation welcomed everyone and Mayor Catherine Ferguson of White Rock was on hand to bring greetings from Snowbirds Fly For CH.I.L.D. Host City. Photo Credit: Linda C.

Canadian Forces Snowbirds Pilots speak to excited children and answered their questions about the team and their flying experiences. Acquiring autographs was a must! Everybody was treated to a delicious buffet by Platinum Catering, with CH.I.L.D. volunteer Estrellita Gonzalez (center right) helping with decorating Landmark Aviation's President's Boardroom for the event. Thank you to CH.I.L.D. Foundation Director Scott Harrold!

Thank you to Coast Capital Savings (below) for being a Presenting Sponsor with Bombardier Inc. and enthusiastically manning a CH.I.L.D. Foundation information tent on the beach. WestJet volunteers (above) also manned a decorated tent for The CH.I.L.D. Foundation.

# SNOWBIRDS FLY FOR CH.I.L.D. ON A SUNNY SPECTACULAR DAY IN WHITE ROCK

The first day of summer in the Vancouver Lower Mainland was celebrated in White Rock, B.C. with the amazing Snowbirds Fly For CH.I.L.D. event. Clear skies and sunshine warmed the crowd of nearly 60,000 at the beach and on patios overlooking Semiahmoo Bay. The Canadian Forces Snowbirds are Ambassadors for The CH.I.L.D. Foundation and the aerial demonstration showcased what remarkable men and women serve in the Canadian Forces, and highlighted the need for research for children with Crohn's Disease, Ulcerative Colitis and liver disorders.

CH.I.L.D. volunteers sold commemorative T-Shirts donated by Sanmar Canada and raffle

tickets for a trip for two anywhere in WestJet's world, with all proceeds going to the Foundation.

Presenting Sponsors Bombardier, Coast Capital Savings, Landmark Aviation, Peace Arch News, Black Press and the City of White Rock were instrumental in making this event so successful, as well as Sponsors White Rock Tax & Accounting, Epcor, and The Boathouse Restaurant. Broadcasting remote from the event site, Rock 101 and CKNW Radio added excitement for the crowds. We so appreciated the Naden Band of Maritime Pacific from Victoria who played for dinner guests after the aerial show – they added the magic to an awesome evening.

## SNOWBIRDS FLY FOR CH.I.L.D. COLOURING CONTEST

Sponsored by Thrifty Foods, the Snowbirds Fly For CH.I.L.D. Colouring Contest was won by 10 year old Serena of White Rock, who loved her new pink bike donated by Thrifty Foods and happily posed for a picture with Her Worship Catherine Ferguson, Mayor of White Rock, Mary Parsons, President & Chief Executive Officer of the CH.I.L.D. Foundation, and Kevan Dick, Assistant Manager of Thrifty Foods.

Above Left to Right: Major Chris Hope, Team Lead, presents Chairman of the Board, Grace McCarthy with a signed commemorative plaque; Rita Walters, Peace Arch News, accepts Sponsor Plaque from Grace McCarthy; WestJet volunteers are bombarded by the appreciative crowd; Mayor Catherine Ferguson of White Rock, Gordon Hogg, MLA for Surrey White Rock, Russ Hiebert, MP for South Surrey, and Scott Harrold, Director, CH.I.L.D. Foundation with members of the Snowbirds Team; Director Red Robinson and Grace McCarthy with the Naden Band of Maritime Pacific Forces. Photo Credit: Linda C.

## NEW HANDS IN THE LAB

### Medical Student Alexa Glesby summers in CH.I.L.D. Foundation Research Laboratory

*Through a unique collaboration between the CHILD Foundation and the scientists and gastroenterologists at BC Children's Hospital, BC native Ms. Alexa Glesby, currently a medical student at the Royal College of Surgeons in Ireland, spent the summer working both in the CHILD Foundation laboratory, headed by Dr. Bruce Vallance, CH.I.L.D. Foundation Research Chair, and with inflammatory bowel disease (IBD) physicians to try and understand more about IBD.*

In the laboratory, Alexa worked with PhD student Ms. Natasha Ryz, who is researching the role of vitamin D in IBD. While the exact cause of IBD is unknown, evidence suggests that environmental factors, including childhood infections, diet and low vitamin D levels may play a role in triggering IBD. Vitamin D is found naturally in certain foods and is produced in the skin during exposure to sunlight. Interestingly, IBD is most common in northern countries such as Canada where sunlight exposure is limited. This observation first suggested a potential link between vitamin D and IBD. Later studies showed that patients with IBD often suffer from vitamin D deficiency and this deficiency has been associated with more active IBD and longer disease duration. One form of vitamin D is a hormone that plays many different roles in the body, including acting on the immune system. A recent study of Crohn's disease patients showed some beneficial effects of vitamin D on disease activity, suggesting that it might prove useful as a treatment in IBD patients. Furthermore, in laboratory mice, vitamin D treatment has also been shown to help prevent some forms of colitis. Despite these interesting findings, scientists do not know exactly how vitamin D works, or what limitations it might have in treating IBD.

Our research asked the questions: "How does vitamin D protect against IBD?" and "What impact does vitamin D have on the ability of the immune system to fight gut bacteria in IBD?" We asked the second question because most scientists and gastroenterologists believe that one reason people get IBD is that their intestinal immune systems aren't able to properly fight off gut bacteria. In these studies, mice were treated with vitamin D and infected with a special type of bacteria that causes IBD in mice. After ten days, the intestines were analyzed under a microscope. While Natasha studied how vitamin D affected bacterial numbers and the function of the immune system, Alexa examined the type and severity of the tissue damage that occurred in the infected intestine, looking at the same kind of features that pathologists use to diagnose IBD in human patients.

Surprisingly, we found that although treating these mice

*Alexa Glesby, left, working with Natasha Ryz in lab.*

with vitamin D led to less intestinal inflammation, they still suffered intestinal damage because they were found to have significantly more bacteria than usual in their intestines. Upon further investigation, we found that the vitamin D treated mice showed a decrease in a specific kind of immune cell in their intestines. This particular type of immune cell is known to promote autoimmune diseases like IBD, but also plays a role in protecting the intestine against disease causing bacteria.

These findings indicate that vitamin D may work to protect against IBD by suppressing certain immune cells. However, they also indicate that caution must be taken in using vitamin D as a therapy, since high levels of vitamin D may reduce the intestine's defenses against bacteria. Since bacteria play a role in causing IBD, it is possible that the use of vitamin D might inadvertently worsen the course of the disease in some cases. Future work in the lab will explore in greater detail how vitamin D affects the immune system, and test whether the use of vitamin D with other treatments (such as antibiotics) might offer greater potential as therapies for IBD.

*Continued next page.*

Continued from previous page.

When she wasn't in the lab, Alexa was exploring the potential link between IBD and liver diseases in paediatric patients with BCCH gastroenterologist Dr. Orlee Guttman. It is well known that the frequency of chronic liver disease is higher in patients with IBD than in the general population. Both Ulcerative Colitis and Crohn's disease are linked to several liver diseases including Autoimmune Hepatitis, Autoimmune Sclerosing Cholangitis, and Primary Sclerosing Cholangitis. Patients with IBD often undergo routine blood tests and sometimes abnormalities in liver tests are noted even though these patients display no signs of liver disease. It is not clear how often these abnormalities occur, and whether they reflect unrecognized liver problems in a portion of IBD patients. Alexa's study aimed to develop a better understanding of how often children with IBD show these liver test abnormalities, and to determine if there is any relationship between liver test levels and i) IBD activity level, ii) IBD medication use, or iii) the development of chronic liver disease in IBD patients.

Reading over the medical charts of all IBD patients diagnosed at BC Children's Hospital between the years 2005 to 2011, Alexa collected information from hundreds of patients and built a database to assess the relationship between IBD and liver abnormalities. Data were gathered to measure the number of IBD patients who are affected by chronic liver disease.

Alexa also looked at the number of IBD patients with abnormal liver tests in the absence of liver disease. She analyzed how

often these abnormalities occurred, and whether a cause was identified for the liver problems.

The information obtained from this study will not only help clarify the relationship between IBD and chronic liver disease but will ultimately improve the way patients with IBD are cared for, by increasing our understanding of the impact of this disease on organs outside the gut.

**Orlee Guttman MD, MEd, FRCPC, FAAP**, Clinical Assistant Professor, Department of Pediatrics, Division of Gastroenterology, left, with patient.

## IBD DAY FOR KIDS

Hosted by BC Children's Hospital's Division of Gastroenterology, Hepatology and Nutrition, IBD Day for Kids was held this year at the Moberley Arts Centre in Vancouver. The CH.I.L.D. Foundation held a popular colouring contest at the event, won by seven year old DJ, who was presented with a HUGE toy dog. A face painter, balloon artist, and guest speakers entertained and informed the guests during the very successful event coordinated

by Kathi Evans, RN, CGN, Nurse Clinician within the Division. Thanks to all the CH.I.L.D. Foundation volunteers who helped on this special day for kids with IBD: Rahul Aggarwal, Estrellita Gonzalez, Sally Puri and Peter Scott.

# Pretty in Pink Fashion Show

for CH.I.L.D.

Honouring Barbara Stewart as Inspiration Award Winner for 2011 With Presenting Supporter Macquarie Group Foundation

Barbara Stewart, 2011 CH.I.L.D. Inspiration Award Recipient and Grace M. McCarthy, O.C., O.B.C., Chairman of the Board, CH.I.L.D. Foundation.

Enthusiastic Staff at The Terminal City Club welcome guests.

WestJet volunteers present the Grand Raffle Prize of a trip for two to anywhere in WestJet's world to lucky winner Audrey Coultts, center.

Macquarie Group Foundation

With Presenting Supporter Macquarie Group Foundation, the 6th Annual Fashion Show for CH.I.L.D., dazzled over 200 guests at the Terminal City Club in May of this year. Expertly commented by Maureen Elliott, owner of ORQUIDEA in West Vancouver and emceed by CBC's own Belle Puri, the afternoon honoured Barbara Stewart with The CH.I.L.D. Foundation Inspirational Award, "who inspires us all to become better, more involved citizens through her dedicated efforts on behalf of special needs children, and the warm, uplifting consideration she extends to every-one she meets."

The event was the culmination of a great number of volunteer hours, from the runway models and the amazing entertainment by Dolores Scott, Edd Wright and Victor Yankovintch to the hair design by Corene Lane of Shear Bliss Hair Studios and Make-up artistry by Katrina Wrobel. The beautiful programmes and tickets were graciously printed by Samco Printers. WestJet personell managed the registration desk and also brought along a wonderful prize – a trip for two to anywhere in the world WestJet travels! Thank you to all our Sponsors for enabling a wonderful afternoon honouring Barbara Stewart, giving all who attended the highest example of volunteerism.

Thank you to our most able 2011 Chair of Fashion Show for CH.I.L.D., Ferzana Jamal, Director, CH.I.L.D. Foundation. The event raised more than \$18,000. for IBD research for children.

Photo Credit: Linda C.

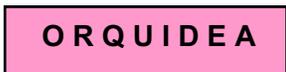

Ferzana Jamal, Director, CH.I.L.D. Foundation and Chair, Fashion Show for CH.I.L.D. 2011.

Thanks to Belle Puri, our talented Emcee!

Dolores Scott and Edd Wright provided the fabulous vocal entertainment, accompanied by Victor Yankovintch on piano.

**GIVE THE GIFT OF HEALTH...  
THERE IS NO GREATER GIFT.  
Children continue to miss school,  
miss the playground  
and miss a childhood.  
We are determined to find a cure.**

**SEND A SPECIAL GREETING  
AND HELP VERY ILL CHILDREN AT  
THE SAME TIME!**

The CH.I.L.D. Foundation has an array of Greeting Cards for Donors – for Birthdays, Weddings, Anniversaries, Bar Mitzvahs, Christmas, etc. You may include your own message of Congratulations or Sympathy. The cards can be printed and mailed individually to any person you wish to honour for a special occasion or to send condolences to a bereaved family. For a donation to the CH.I.L.D. Foundation Donors receive a Charitable Tax- Exempt Receipt.

**Special Thanks  
to these Special People!**
